

Valtireo
ORGANIZATIONAL OS

Brand Guidelines

A project-based identity system for Valtireo by Leading Digitals.

VERSION 1.0 / 2026

Brand Idea

Valtireo is not just HR software. It is organization infrastructure: a system for people, structure, approvals, documents, compliance, internal services, and intelligence.

Clarity and control for real organizations.

Structured

Every workflow has a place, owner, status, and trail.

Trusted

Built for sensitive staff, compliance, and approval data.

Operational

Designed for daily HR, admin, ICT, finance, and leadership work.

Logo System

The recommended mark is a structured V built from operating layers. It suggests organization, visibility, modular systems, and controlled movement.

Mark Construction

The mark combines three ideas: a V for Valtireo, layered planes for organizational systems, and small nodes for decision points and intelligence.

Layered V

Core operating layer for the organization.

Gold node

Decision, approval, and governance moments.

Cyan node

AI, automation, and intelligence assistance.

Deep base

Trust, control, and enterprise seriousness.

Colour Palette

Valtireo keeps a family relationship with Leading Digitals, then deepens the palette for calm enterprise product use.

Use Pine, Ink, Canvas, and white for most product UI. Use Gold sparingly for governance highlights and Cyan for AI or automation moments. Avoid large teal-only screens.

Typography

Valtireo typography should be clear before it is expressive. The product is data-heavy, so readability wins.

Manrope / Inter

**Structure your organization
before complexity takes over.**

Recommended: Manrope for brand headings and Inter or Instrument Sans for product UI. Use sentence case for interface labels. Avoid decorative letter spacing inside the application.

Voice and Messaging

Valtireo should speak like a calm operational partner: precise, useful, and serious without being cold.

Use

Manage your people, workflows, approvals, and documents in one place.

Give every request an owner, status, and trail.

This employee is missing 2 required documents.

This request is awaiting HR Director approval.

Avoid

Revolutionary future of work.

Supercharge your workforce with AI magic.

Beautiful HR for happy teams.

The ultimate all-in-one solution.

Module Naming

Valtireo is the parent product. Modules should feel like parts of one operating system, not separate unrelated apps.

Valtireo Core	Valtireo HR	Valtireo Documents	Valtireo Leave
Valtireo Attendance	Valtireo Desk	Valtireo Payroll	Valtireo Recruit
Valtireo Performance	Valtireo Learning	Valtireo Assets	Valtireo Compliance
Valtireo Central	Valtireo AI		

Avoid presenting Valtireo publicly as only Valtireo HRMS. HR is the first entry point, but the brand must be able to hold documents, approvals, internal services, compliance, finance/admin, Central, and AI.

Product UI Principles

The visual identity must survive inside dense operational screens, not only on marketing pages.

Operational clarity

Every screen should answer what it is, who owns it, what status it has, and what action is needed.

Role-aware by default

Dashboards, actions, reports, and navigation should adapt to HR, compliance, ICT, finance, supervisors, and employees.

Audit-ready

Use timelines, metadata, and activity panels without making the UI feel like a legal form.

Dense, not cluttered

Tables, filters, approval queues, documents, and reports are first-class patterns.

AI as assistance

AI should reduce admin burden, not turn the product into a chatbot costume.

Application Example

A dashboard-first product direction: calm, modular, scannable, and built for records, approvals, documents, and audit trails.

Logo Misuse

Keep the identity disciplined. Valtireo should feel controlled, trustworthy, and consistent.

- X** Do not stretch or distort the mark.
- X** Do not place the logo on low-contrast backgrounds.
- X** Do not replace the palette with random gradients.
- X** Do not use generic people, gear, globe, or shield icons as the primary mark.
- X** Do not use Valtireo HRMS as the main public brand.

**Organize.
Automate.
Govern.
Grow.**
